

# 250 Man SIP/ H2S Protection Shelter

Please find below the description of this Uniteam 250 man SIP, customized solution built for easy transport and relocation as it's built by 11 standard ISO containers size (10x40' and 1x10'). The sealing between the containers solved by Uniteam patented GSSP gaskets, gives quickly deployment of SIP at site, with minimum downtime of the ongoing production.

Option: With Breathable Air Bottle Bank provided by EUREKA, it will by overpressure protect employees for more than 2 hours during an emergency. F&G control by AUTRONICA will make sure your warnings are informative and correct with a SIL-2 Control System.
