

Offshore HSE container

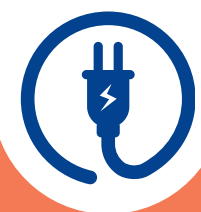

The Offshore HSE Container is a robust 20 ft offshore-rated unit designed to serve as an emergency container. Certified to DNV 2.7-1 and aligned with Norsok Z-015 requirements, it houses a dedicated emergency shower, toilet facility, and a spacious storage area. Finished in RAL 1003 Signal Yellow or selected color, this container ensures full compliance, high durability, and seamless integration into remote offshore operations.

GENERAL SPECIFICATIONS

- Robust 20-ft DNV 2.7-1 container built to DNV-ST-E271 and Norsok Z-015 standards
- Three dedicated compartments: emergency toilet, emergency shower with a 1000L water tank, and equipment storage
- Finished in RAL1003 Signal Yellow, or selected color, marked with "HSE CONTAINER"
- 50mm thermic insulation.
- Fire insulation available as option
- Interior partition walls in matching sandwich panel

ELEC/Furniture

- IEC 61892 compliant electrical installation with EX-certified components
- Dedicated 16A circuits for room lighting, socket outlets, and heaters
- LED fixtures with backup battery-powered escape lights in each compartment
- Durable shelving for secure, efficient HSE equipment storage

The above are standard dimensions; other sizes may be supplied on request.
